

## NEW BOOK FROM IBRA

**Field Notes on Queen Rearing** by Oliver Field, published by IBRA, 31 pages, soft back **£3.00** plus postage and packing.

Due to popular demand, IBRA is pleased to publish this updated version of a talk given to the Scottish Beekeepers Association in 1998. This new version includes colour pictures, a bee breeding chart and a chapter titled 'Current Reflections'. The author has been involved with honey bees since boyhood and was a professional bee farmer for over thirty years: this practical background and depth of understanding shines through every page.
