

Stencilling Fun

Cut out these black shapes very carefully making sure not to damage the paper or thin card from which you cut the shapes. You can then use the card from which you cut the shapes as a stencil. You place the stencil on poster paper and then dab paint over the holes in your stencil with a sponge or stipple brush. Hold the stencil tightly on the page to make sure you don't paint under the edges of the holes in the stencil. You will then have transferred the stencil shape on to your poster. You can repeat with the same or different colours until the stencil is worn out. It is best to use poster paint.

Hang your poster on the wall using bluetack.
